

The diagram illustrates a repeating pattern of diagonal lines. It is organized into three distinct sections, each separated by a horizontal line. Each section contains four rows of the pattern. The pattern itself is composed of two sets of parallel diagonal lines: one set sloping downwards from left to right, and another set sloping upwards from left to right. These two sets intersect to form a series of small, elongated diamond shapes. The lines are black on a white background, and the overall structure is symmetrical and repetitive.
